LAB 03 TASK

Task 01

Install SAMBA Server on your Ubuntu to enable file sharing. You must follow the below steps to perform the installation:

- Make a user of your rollNo (e.g. k220876)
- Make a directory have the following name:
  yourRollNo_sharingFolder (e.g. k220876_sharingFolder)

Task 02

After you install your samba server sharing the following files across OS:

- A text file that has your name, roll_no. The file name should be your roolNo as well. Use the terminal command to create the file.
- An audio file
- A video file

Task 03

Make two users named **user1** and **user2**. Create two folders **shareFolder1** and **shareFolder2**. Now configure the samba configuration file in such a way that user2 can only read shareFolder1 and sharFolder2 and cannot write it. User1 can read and write both the folders.
